

FUND DESCRIPTION

“The financial transformation”

Companies within this fund are expected to benefit from the introduction of technologically enabled new products or services that potentially change the way the financial sector works and may develop, use, or rely on e-commerce, digital wallets, and global payments.

INVESTMENT OBJECTIVE

This actively managed fund seeks to achieve long-term growth of capital by investing primarily, under normal circumstances, in global equity securities of companies that are or are expected to be focused on financial technology innovation, including the shift of the financial sector and economic transactions towards payment infrastructure platforms and technically enabled web-based intermediaries.

WHY INVEST?

1. Exposure to innovation

Aims for thematic multi-cap exposure to fintech innovations, including: e-commerce, digital wallets, and global payments.

2. Growth potential

Aims to capture long-term growth with a low correlation of relative returns to traditional growth strategies and negative correlation to value strategies.

3. Tool for diversification

Offers a tool for diversification due to little overlap with traditional indices. It can be a complement to traditional value/growth strategies.

4. Grounded in research

Combines top-down and bottom-up research in its portfolio management to identify innovative companies and convergence across markets.
